PERSONALIZED NEW ENGINE COMPARISON ENGINE ABOUT

Great tool... both the comparison engine and the clustering engine. Your clustering engine is so unique. I tried it a bit, looks quite nice and useful! Hard for me to say how much Google would pay for this, obviously... look what people say about SnakeT!

Swoogle

The screenshot shows the Swoogle Semantic Web Search Engine interface. The search term 'clustering' is entered in the search box. The results list several RDF documents related to clustering algorithms and ontologies. The first result is from 'http://www.cs.vu.nl/~mcklein/unspsc/unspsc84-title.rdf'. Other results include 'http://mense.si.lupui.edu/ontology/OMIM_add_on4.owl', 'http://mged.sourceforge.net/ontologies/MGEDOntology.owl', 'http://cvs.mygrid.org.uk/cgi-bin/viewcvs.cgi/mygrid/feta/etc/sampleData/mygrid-reasoned.rdf?rev=1.3', 'http://media.iti.gr/iswc2004/system_ontology.rdf', and 'http://twiki.mygrid.org.uk/twiki/pub/Mygrid/TavernaBuildForSMB/mygrid-services-lite.rdf'. The interface includes navigation links like 'ontology', 'document', 'term', and 'more', and a 'Swoogle Search' button.

9

CodeFetch

The screenshot shows the CodeFetch search engine interface. The search term 'Java API' is entered. The results list various Java API classes and methods, such as 'javax.naming.ldap.SortControl', 'javax.naming.ldap.SortKey', 'javax.naming.ldap.SortResponseControl', 'javax.swing.SortingFocusTraversalPolicy', 'java.util.Arrays', 'javax.swing.plaf.basic.BasicDirectoryModel', 'java.awt.Frame.getCursorType', 'javax.naming.ldap.SortResponseControl.isSorted', 'java.nio.charset.Charset.sorter', 'java.util.concurrent.PriorityBlockingQueue.Comparator', and 'java.util.Collections'. The interface includes a search box, a 'Fetch' button, and a list of search results with their respective classes and methods.

11

CodeFetch

The screenshot shows the CodeFetch search engine interface. The search term 'clustered' is entered. The results list various programming languages and frameworks, including C, C++, Delphi Pascal, Java, Objective C Cocoa, Python, Ruby / Rails, Cold Fusion, Flash ActionScript, HTML / CSS, Javascript / J/ys, JSP / JSTL / JSF, Perl, PHP, Ant, Apache Configuration, AppleScript, SQL, Unix / Shell, XML Schema, and XSLT / XPath. The interface includes a search box, a 'Fetch' button, and a list of search results with their respective languages and frameworks.

10

Google Scholar

The screenshot shows the Google Scholar search engine interface. The search term 'clustering hotho' is entered. The results list several academic papers related to clustering, including 'Ontology-based text clustering', 'Ontologies Improve Text Document Clustering', 'Comparing conceptual, divisive and agglomerative clustering for learning taxonomies from text', 'Explaining Text Clustering Results Using Semantic Structures', 'Wordnet improves text document clustering', and 'Text clustering based on background knowledge'. The interface includes a search box, a 'Search' button, and a list of search results with their respective titles and authors.

Abstract: Text clustering typically involves clustering in a high dimensional space, which appears difficult with regard to virtually all practical settings. In addition, given a particular clustering result it is typically very hard to come up with a good explanation of why the text clusters have been clustered the way they are. (Update)
