CLUSTERING ENGINE (BETA) NEWS ENGINE COMPARISON ENGINE ABOUT

Personalized **SnakeT** ALPHA

SNippet Aggregation for Knowledge ExTraction

Great tools... both the comparison engine and the clustering engine. Your (clustering) engine is so unique.

I tried it a bit, looks quite nice and useful! Hard for me to say how much Google would pay for it, obviously...

[Comment on this article](#)

Abstract: Text clustering typically involves clustering in a high dimensional space, which appears difficult with regard to virtually all practical settings. In additions, given a particular clustering result it is typically very hard to come up with a good explanation of why the text clusters have been clustered the way they are. [\(Update\)](#)

Rollyo

The screenshot shows a Mozilla Firefox browser window with the address bar set to <http://www.rollyo.com/>. The browser's menu bar includes File, Edit, View, Go, Bookmarks, Tools, and Help. The page content features a red background with a white banner at the top. On the left of the banner is the ROLLYO BETA logo, which consists of the word "ROLLYO" in large, bold, black letters with "BETA" in smaller letters below it, and a red 3D target icon to the right. To the right of the logo, the text reads "Roll your own search engine." followed by "Create personal search engines using only the sources you trust. Relevant. Reliable. Rollyo." Below this text are two links: "Learn more about Rollyo" and "Firefox Quickstart". A large red arrow button with the text "GET ROLLING!" is positioned to the right of the text. Below the banner is a section titled "HIGH ROLLERS" with the subtitle "Check out these searchrolls by some of our favorite users". This section contains three user profiles, each with a small profile picture, a title, the author's name, a search input field, a "Go" button, and an "Add to my Rollyo" button with a red plus icon. The first profile is "Arianna's Top Political Blogs" by Arianna Huffington. The second is "Online Shopping" by Debra Messing. The third is "String Theory" by Brian Greene. At the bottom of the browser window, the status bar shows "Done" and a search bar with the text "Find: clustering" and options for "Find Next", "Find Previous", "Highlight all", and "Match case".

Vielen Dank für die Aufmerksamkeit.
